Key Vocabulary

Mammals	A mammal is an animal that breathes air, has a backbone, and grows hair at some point during its life. Mammals give birth to live young and feed them milk. They are warm blooded.
Amphibians	Amphibians are cold-blooded animals made up of frogs, toads and salamanders. They live on land and water. They lay their eggs in water.
Reptiles	Reptiles live on land and water. They land their eggs on land. They are cold blooded.
Fish	A fish has gills instead of lungs and fins instead of legs. They live in the water. They lay their eggs in the water. They are cold blooded.
Birds	Birds have a beak, feathers, wings and 2 legs. They lay eggs that have hard shells. Birds are warm blooded. Not all birds can fly.
Habitat	A habitat provides the basic needs for all living things such as animals including humans and plants.

Sticky Knowledge

There are many different animals with different characteristics.
